

Dear Julien, Gaël & Thomas,

My name is Daria, originally from Ukraine, and I have been living in Belgium since the summer of 2022.

I am an accomplished Graphic / UX Designer and Web Developer with over nine years of experience creating dynamic, impactful designs for print and digital platforms. My approach focuses on understanding client needs and transforming ideas into visually compelling, functional solutions. I am proud to deliver results that meet expectations while elevating each project's potential.

I am committed to continuous learning and development, constantly refining my skills in design, technology, and the appreciation of everyday aesthetics. I quickly adapt to new tools and technologies, enabling me to approach projects with the necessary expertise. Currently, I am studying Dutch and improving my proficiency in English.

I thrive in team environments and take great satisfaction in contributing to projects that combine creativity with technical expertise.

Please feel free to review my full CV and portfolio, which are always up-to-date on my personal website.

I look forward to the opportunity to share my experience and passion for design with your company.

Thank you in advance for your time and consideration.

Kind regards,

Daria Germash
