LANGUAGES

Native tongue

Ukrainian, Russian

Commonly-Used languages

English **B2** Dutch **B1**
(Keep learning)

SOFT SKILLS

I have a good skills in understanding clients and colleagues in field of tasks they want to give but couldn't find words to explane it clearly. My limited knowledge of Dutch is not a barrier for understanding tasks and opinion of those who give them, explaining my vision of resolving issues and usual chatting with colleagues.

Every day of my work experience on site in Mintus helps me to develop and improve my comunication skills, using the language I've started to learn a little bit more than year and half ago. Working flow in my team in contact with other divisions as well as external organizations helps me in selfdevelopment and understanding needs of colleagues, their expectations from my work, and provides getting qualified product as the result.
